NEW!

#8 Remediate Legacy Policies and Practices

NEW!

Understanding of Team Topologies and Organization

Stream-aligned team

Organized around the flow of work and are optimized to build and deliver value quickly, safely, and independently.

Complicated subsystem team

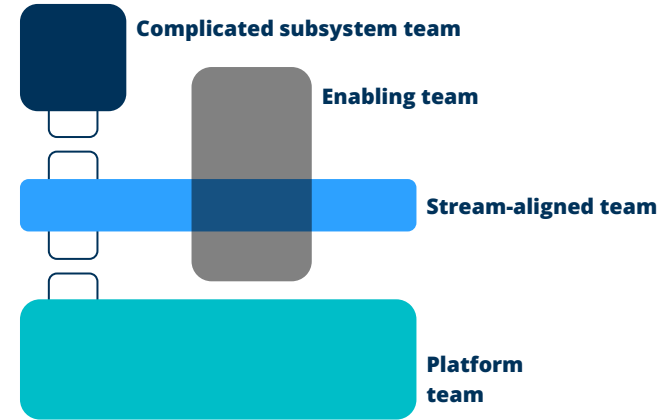

Provide specialists to reduce the cognitive load on other teams.

Platform team

Organized around the development and help stream-aligned teams to deliver work with substantial autonomy.

Enabling team

increase the autonomy of stream-aligned teams by growing their capabilities with a focus on problems, rather than solutions.
